DataStoreDSX

End-to-end information governance and compliance with DataStoreDSX –

Secure, share, and mitigate the risk of managing your organization's critical content.

+ Cost of non-compliance is nearly **3x the cost of compliance**

+ 5 to 10% **increase** in efficiency

+ Save up to **90%** on print and mailing costs by securely delivering online

Putting your content to work

Whether buried under mountains of paper and electronic documents or struggling to meet the demands of regulators, DataStoreDSX delivers end-to-end control of content across the organization by integrating with your internal systems. Put your organization's content to work so you can capture, retrieve on demand, analyze, archive, and interact with your information, saving users time, while increasing responsiveness to avoid fines and penalties.

"" **If not for DataStoreDSX the process of providing sight of original documentation, and ensuring regulatory compliance would have been an impossible task. For these reasons and the benefit of not having to store and retrieve large volumes of documents make DataStoreDSX a real success at Charles Stanley." –** Mike Pitts, ICT Director, Charles Stanley

With the cost of non-compliance now nearly 3x the cost of compliance, a sound information governance policy enforced by a solution such as DataStoreDSX is critical to mitigating risk and ensuring business continuity.

If you're faced with the myriad regulations, and their constant updates, then DataStoreDSX can help with:

- Know Your Customer
- Dodd-Frank
- FOIA
- SEC Rule 17a-4
- FACTA
- MiFID II

- FINRA
- USA Patriot Act
- FCPA
- American Recovery and Reinvestment Act
- Basel II

Regulatory Compliance

Regulations are on the rise, and your organization needs a solution to ensure you're in compliance to avoid fines, penalties, litigation, and reputational damage.

- Complete audit trail to meet strict regulatory requirements
- Proactively protecting your organization from non-compliance, which can cost 3x more than maintaining compliance
- Demonstrating operational excellence within your organization, among your peers, and in the market

Single Source of Truth

Provide your organization one access point for all relevant information to facilitate sound business decisions made from complete information.

- Efficient and streamlined business processes with an enterprise-standard database
- Enhanced and complete information to ensure no disruption to business continuity
- Improved business performance with critical information available at every decision point

Business Agility

Reduce operating costs through streamlining business processes and eliminating inefficiencies to ensure your organization is better informed and more agile than your competitors.

- Increased competitive advantage through operational excellence
- High availability so business doesn't suffer from a loss of critical information
- Agility to continually monitor and adapt to changing market conditions such as evolving retention standards
